Professional Summary

Computer Science graduate with practical experience in full-stack web development (React, Next.js, FastAPI) and Applied AI (RAG, ChromaDB). Proven track record developing production-grade ERP modules, client web applications, and REST APIs. Strong grasp of Data Structures, OOP, and modern software design patterns.

Skills

Programming Languages: C++, JavaScript, Python
Web Technologies: React.js, Next.js, Vite, HTML5, CSS3, Tailwind CSS, Bootstrap, WordPress
Databases & APIs: SSMS SQL, SQL Queries, Data Validation, REST API Integration
Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), Computer Networks
AI & Emerging Technologies: RAG, Ollama, ChromaDB, FastAPI
Developer Tools: Git, GitHub, VS Code, Postman
Professional Skills: Problem-Solving, Analytical Thinking, Teamwork, Agile Workflow, SDLC, Leadership

Education

Shri Shankarachary Technical Campus, Durg, Chhattisgarh 2022 - 2026
Bachelor of Technology in Computer Science Engineering *8.2 CGPA*

Experience

Aon Digicon LLP May 2025 – Jul 2025
Web Development Intern (OnSite) *Korba, Chhattisgarh*

- Developed 6+ reusable React/Tailwind components for ERP inventory and requisition modules, integrating 12+ REST endpoints with optimized validation to streamline frontend workflows.
- Worked on LIMS (Laboratory Information Management System) and microservices-related development, gaining exposure to modular enterprise applications, service integration, and business process workflows.

Projects

Internkul: Education Platform | Vite, React.js, TypeScript, Tailwind CSS, REST API Integration, SEO Link

- Developed responsive frontend interfaces for course catalogs, batch pages, and navigation; integrated team-provided REST APIs and implemented client-side validation and error handling to improve data reliability, platform usability, and search engine discoverability through SEO optimization.

Sharda Medical Store | Next.js, React.js, Tailwind CSS, Technical SEO Link

- Independently developed and deployed a production client website with responsive product pages and contact functionality, delivering an accessible online experience across desktop and mobile devices.
- Achieved a 99% desktop Lighthouse performance score with 0.3s First Contentful Paint and 0 Cumulative Layout Shift; optimized technical SEO to achieve Google search rankings between positions 1–6 for relevant queries.

Local LLM & Hybrid RAG Application | Python, FastAPI, Ollama, ChromaDB, Embeddings Link

- Engineered a local PDF Q&A application using FastAPI and Ollama (Llama 3/Mistral), processing multi-page documents entirely offline with an average query-response latency under 3 seconds.
- Optimized semantic retrieval accuracy by 40% by implementing recursive text chunking (500-token blocks, 50-token overlap) and ChromaDB vector similarity searches to eliminate hallucinations and provide precise source citations.
